

Escape 17A

ABOUT THE ESCAPE 17A

The Escape 17A trailer is an ultra-lightweight option for families seeking the perfect camping adventure. Most customers consider this trailer to be the best crossover from tent camping. The Escape 17A is ideal for young families and adventurers with smaller vehicles.

The E17A features no wet bath, allowing for a permanent bed in the front and a four-person dinette in the rear. Escape 17 trailers are highly maneuverable on narrow roads, and their shorter length makes tight turns easy to handle. With a dry weight of only 2290 lbs, it is designed specifically for mid-sized vehicles like SUVs and mid-sized trucks with a minimum towing capacity of only 3500 lbs. The frame is constructed with box steel and a rubber ride torsion axle suspension, providing a solid foundation

and smooth ride. The interior is professionally finished with a choice of Oak, Maple, or Contemporary cabinetry, large windows, high-grade vinyl flooring, and a unique insulated vinyl headliner/wall covering. Every Escape trailer includes a long list of standard features and an extensive options list for personalization, along with a limited two-year warranty.

The body of the trailer is constructed from top and bottom fiberglass shells bonded together with glass reinforced fiber to create a true one-piece unit. The roof has a raised dome allowing water to run off, reducing the chance of water penetration while maintaining a strong, long-lasting lightweight trailer.

Escape trailers offer abundant interior storage space, especially in the large overhead cabinets. Light-colored hygienic wall coverings and large windows throughout each unit create a more roomy, bright space. They utilize real wood for cabinet doors along with plywood for tables, countertops, and floors. The Escape 17A is the perfect blend of high-quality design and function, both inside and out.
