

Escape 23

ABOUT THE ESCAPE 23

With flexible sleeping arrangements, innovative acrylic windows, a low-maintenance aluminum frame and rear door for easy access, the Escape 23 maintains the Escape legacy with its robust fiberglass construction – it's the epitome of travel freedom.

This unit is loaded with high-end base features including a Victron Energy Power Package: 3000W Mutliplus Inverter Charger with remote switch, 100/30 Smart Solar MPPT Controller, Smart Shunt Battery Monitor, Touchscreen Display, DC to DC Smart Charger.

In addition you can enjoy the Lippert Solid Step for added safety and the comfort of a Houghton Air-Conditioner/Heat Pump.

If you enjoy the ability to go off grid, the large holding tanks, and the two lithium batteries will assist you in your endeavours (option to upgrade to four batteries upon request).

The roof has a raised dome allowing water to run off rather than pooling. This greatly reduces any chance of water penetration

while maintaining a strong, long-lasting lightweight trailer.

Our customers are pleased that Escape trailers offer ample interior storage space, especially in the large overhead cabinets. Light-colored hygienic wall coverings and large windows throughout each unit creates the feel of a more roomy, bright space.

The Escape 23 is a perfect blend of highquality, design and function both inside and out.
